

SCIENCE SAYS

WHO WE ARE

A community of friendly UC Davis scientists dedicated to making scientific research accessible, relevant, and interesting to everyone.

WHAT WE DO

We offer training and outreach opportunities to grad students, postdocs, and early career scientists at UC Davis. For inspiration, here are a few of our projects:

HOW WE DO IT

Science Says is led by a team of graduate students who are passionate about science communication. Their efforts are supported by the program coordinator and Faculty Director of the Institute for Food and Agricultural Literacy (IFAL). Science Says is an initiative of IFAL.

KEY TAKEAWAYS

There exists a need and desire for science communication training to serve early career scientists at universities like UC Davis.

Student leadership allows the organization to best serve its graduate student and postdoc members, since it is led by the people it serves. Support from faculty/staff is critical as well.

DavisScienceSays

SCIENCE BOOK CLUB

We host a public book club to discuss popular science books. Held at the local public library so it's accessible to both the campus community and the Davis community at large.

SACRAMENTO'S SCIENCE DISTILLED

Bright and engaging local scientists share research stories to inform and entertain. Once a month at a pub in downtown Sacramento.

FARMERS MARKET OUTREACH

We host a monthly table with science-themed activities at the Davis Farmers Market.

WORKSHOPS

We offer workshops on topics such as science storytelling, translating your research, and science writing.

BLOGS

Members write blogs examining scientific topics popular in the news, and other science-related content.
